## CITY MANAGER'S NOTES

April 19, 2018

### Upcoming Council Meetings

City Council will meet on **Monday, April 23, 2018**. A Study Session will begin at 6:00 p.m. in the Community Room.

City Council will meet on **Friday, May 4, 2018**. A meeting with Congresswoman Diana DeGette will begin at 9:00 a.m. in the City Council Conference Room.

City Council will meet on **Saturday, May 5, 2018**. A Council Strategy Session will begin at 8:00 a.m.

City Council will meet on **Monday, May 7, 2018**. A Study Session will begin at 6:00 p.m. in the Community Room. The Regular Meeting will follow at 7:00 p.m. in Council Chambers.

### Informational Items

The following attachments are in response to City Council requests, as well as other informational items.

1. Denver Business Journal article: Special Report: How innovations are redefining health care
2. Englewood Herald article: Teachers protest funding gap, some PERA changes at Capital
3. Community Development Newsletter – April 2018
4. Englewood Municipal Court 1<sup>st</sup> Quarter Statistics 2018
5. Invitation: Earth Day – River Walk and Community Cleanup Project
6. Calendar of Events
7. Tentative Study Session Topics

HEALTH CARE REPORT

## Special report: How innovations are redefining health care

🔑 **SUBSCRIBER CONTENT:** Apr 13, 2018, 5:30am MDT

Colorado health systems are investing unprecedented amounts of money in new facilities, and no small amount of that spending is going toward new equipment.

The machines and devices being rolled out by hospitals and physicians are using technology to change major surgeries, ongoing studies, sleep disorders and more.

Here is a snapshot of five innovative devices that are setting hospitals apart from each other and revolutionizing the way patients undergo and recover from procedures.

### **Ablations without X-rays**

During the average cardiac ablation, patients and physicians are exposed to a level of radiation equivalent to 75 chest X-rays. Doctors use the technique to guide tubes through the neck and into the heart to scar tissue and get it beating regularly again. Physicians also run the risk of increased orthopedic problems, as they wear 40-pound X-ray cloths.

After some 1,000 ablations, Dr. Sri Sundaram's back began hurting, and he decided there must be a better way. Sundaram, the director of cardiac electrophysiology for Centura Health, taught himself how to do the procedure using just ultrasound technology to guide him, eliminating the using of radiation altogether.

Sundaram is one of only about 10 surgeons in the United States that uses ultrasounds for the procedure, and he is the only doctor in Colorado doing it, operating primarily at Porter Adventist Hospital in Denver.

The health outcomes are just as good as procedures using X-rays — without the huge doses of radiation. And he's lowered the average time of the procedure from two hours down to 97 minutes.

"The drawback is a learning curve. But once you figure it out, there's no drawback," Sundaram said. "It's just sound waves now. There's no harm with sound waves."

### **Flex Robot colorectal procedures**

KATHLEEN LAVINE, DENVER BUSINESS JOURNAL

Dr. Sri Sundaram, cardiologist, performs an ablation for atrial fibrillation at Porter Adventist Hospital.

One year ago, Presbyterian/St. Luke's Medical Center purchased a Medrobotics Flex Robot to use for ear, nose and throat surgeries. During the surgeries, a physician navigates a narrow path through a small orifice to test or remove potentially cancerous growths. Dr. [Warren Strutt](#) figured it could work as well going through one of the most sensitive areas of the body — the anus.

On March 19, Strutt used the high-tech machine to remove a growth some 15 centimeters inside an older man — the kind of surgery that previously led to four or five days of recovery in the hospital, as well as the potential permanent addition of a colostomy bag. The man was out of the facility in two days, and Strutt said he thinks the breakthrough will have massive implications to speed and improve the healing of patients who need to have large polyps removed that are unable to be pulled out during a colonoscopy, or even early-stage cancer.

"It not only can be a diagnostic tool, it can be a therapeutic tool," said Strutt, a colorectal surgeon at SurgOne, a Denver-based practice. P/SL is the only hospital with this single-armed robot in the Rocky Mountain West. Strutt anticipates that more patients will gravitate to the Denver facility as the instrument is used more.

### **Indego Exoskeleton**

One year ago, Craig Hospital acquired an Indego exoskeleton. Ever since, officials at the Englewood rehabilitation hospital have been changing lives.

While exoskeletons have been used, for six years or so to help permanently disabled people walk, the Indego is unique in several ways. Its five pieces — one that is worn around the hip and two each for the upper and lower legs — are modular, meaning it can be transported in a car or worn even when someone is in a wheelchair.

And it weighs just 26 pounds, about half the weight of previous models, which could seem bulky, noted Candy Tefertiller, Craig's director of physical therapy.

With the improvements, the exoskeleton is being used on individuals who are fully paralyzed below the waist and those with incomplete injuries that require them to learn how to walk again. Craig patients of both types are using the Indego. The hospital has one large, one medium-size and one small set — and is the only hospital in Colorado with one.

Achieving such movement gets people closer to being ambulatory on their own again and helps regulate bowel movement, avoiding another health problem for the patients. Not only is the hospital testing what further effects the Indego can have on both types of patients, most of whom use it in the facility's workout and rehabilitation center, but it is conducting a study on whether exoskeletons help to prevent loss of bone density after a spinal-cord injury, Tefertiller said.

"I think the market is still trying to understand where exoskeletons fit" in the rehabilitation process, she said. "The technology is so new."

### **Detecting lung cancers**

Despite a reduction in smoking among Americans, lung cancer still leads to more fatalities than any other cancer. And the key to stopping or slowing its progress is early detection and treatment.

Using a Veran device, however, doctors at Kaiser Permanente Colorado and Sky Ridge Medical Center of Lone Tree have taken a procedure that used to yield 52 percent rates of false biopsy results and made it effective between 70 and 80 percent of the time.

That, in turn, means that physicians are catching lung cancer more quickly and avoiding invasive procedures with four- to six-week recovery times in which they only later discovered they were taking out non-malignant growths.

The system works by using a CT scan to give doctors a picture of a patient's lung before they insert a needle through a small incision in the chest and dye the potentially cancerous growth blue, which is key to finding nodules as small as one-eighth inch. Surgeons then can accurately pull out a sample of the growth if it needs to be tested — and can more easily remove the full growth if it's found to be cancerous.

The inability to diagnose nodules correctly at an early stage meant that some people weren't getting treatment until they had stage-three cancer, when stage-one treatment is needed, said Dr. Lanny Dunham, a general and thoracic surgeon at Kaiser's Lone Tree facility. And when bigger incisions were needed to remove larger growths through the ribs, four-day hospital stays and six-week medication periods were not uncommon.

Kaiser and Sky Ridge physicians, who were among the first in the U.S. to begin using this technique in March 2017, now have done about 40 such procedures, with very positive results and quick recoveries.

"The broader context ... is the issue regarding lung cancer and lung-cancer screening," added Dr. Surit Sharma, president of the Sky Ridge medical staff. "It's a much safer, less invasive procedure."

### **Improving sleep studies**

Children's Hospital Colorado researchers, working in conjunction with the University of Colorado-Boulder, have developed an in-ear device that could revolutionize the way medical professionals study and treat sleep disorders.

Traditionally, adults and children who may have conditions like sleep apnea must spend the night in a hospital, where they are fitted with monitoring devices that detect brain activity, breathing and movement. This can be expensive, can cause patients to change their normal sleep patterns because of the unfamiliar settings and can leave researchers unable to monitor their later reaction to drugs.

The in-ear sleeping device developed by Dr. Ann Halbower and Tam Vu, director of the Mobile and Networked Systems Laboratory at UC-Boulder, is like a bug inserted into a patient's ear that takes brain, eye and muscle signals. The invisible device can be worn in the hospital or at home, and it can be used in adults and children, said Dr. Robin Deterding, medical director of the Children's innovation center in Aurora.

Though still in the developmental phase, officials have tested about 15 patients with it over the past year-and-a-half, and they currently are looking for partners to bring it to the point where they can use it in actual sleep studies. But they believe its potential benefits are promising.

"It should be inexpensive. It should be comfortable. It should be accurate," Vu said. "And it should allow us to monitor patients for the long term."

# Teachers protest funding gap, some PERA changes at Capitol

## About 400 educators, many from Englewood, voiced opinion on public-pension system and school funding

Posted Monday, April 16, 2018 7:53 pm

What lawmakers said

The Colorado state Capitol found itself packed nearly wall-to-wall between the state Senate and House chamber doors on April 16, when educators wearing red walked up to legislators to talk about the state's public-pension system and about school funding.

Rep. Jeff Bridges, D-Greenwood Village, spoke to a group of educators from Englewood, who made up a large part of the roughly 400 educators at the event.

“We're decreasing the negative factor by \$150 million” and putting \$225 million toward PERA, said Bridges, whose district includes Englewood. “Even though we've increased funding, there's still a lot more we need to do.”

Rep. Paul Rosenthal, D-Denver, opposed pushing for more burden to be born by defined-contribution plans in the PERA system.

“We don't know what the market will bring,” Rosenthal said. “We should know what PERA will bring.”

Democrats had a field day with the protest, giving remarks in front of educators twice in the building during the day. A crowd of more than 100 educators — lining the staircase and three floors of the rotunda of the stairwell — let loose several seconds of howling cheers intended to echo to the Senate and House chambers.

The crowd heard remarks from a slew of Democratic state lawmakers, including Sen. Rachel Zenzinger, D-Arvada, and Rep. Joe Salazar, D-Thornton. Rep. Brittany Pettersen, D-Lakewood, spoke in solidarity with legislators a few hours later.

Educators in red crowded into the House Finance Committee hearing on Senate Bill 18-200 that afternoon, with about 50 seated and dozens more standing in the back who were moved to an overflow room.

Some educators testified before the committee. A second “Day of Action” is planned for April 27 at the Capitol, the Colorado Education Association said.

Ellis Arnold

[earnold@coloradocommunitymedia.com](mailto:earnold@coloradocommunitymedia.com)

Performances of teachers singing a 1980s rock hit in protest have swept the nation — from Oklahoma to West Virginia to Kentucky — and now, the show came to Colorado.

“We're not gonna take it — no, we ain't gonna take it,” a crowd of educators sang in the state Capitol's stairwell near the House and Senate chambers, coming together in Denver from across Colorado to advocate for more school funding and to oppose some changes to the public-pension system.

The “Day of Action” saw about 400 teachers, staff and other education personnel — about 150 came from Englewood — march on the perimeter of the Capitol and file into the building to talk to lawmakers. The protest April 16 was organized by the Colorado Education Association, which represents more than 35,000 educators, many of whom say too many teachers in the state are forced to work second jobs and pay out of pocket for classroom supplies.

But it wasn't about striking, said Kerrie Dallman, president of the association.

“We haven't asked anyone to walk off the job,” said Dallman, who attended the event. These “educators coming down to the Capitol are using their earned personal leave.”

Many schools and districts — including schools in Jefferson County — planned to hold “walk-ins” instead, Dallman said, by coming together to raise awareness outside of schools before class. But in Englewood Schools, so many employees planned to be absent that day that the district canceled school for all but its preschool.

One of them was Heather Curnett, a teacher at Clayton Elementary School.

“Teachers in Englewood appreciate our community,” Curnett said. This “is not about asking them for more. This is about the state.”

Several teachers voiced opposition to defined-contribution pensions as opposed to the current defined-benefits system. Changes to the Public Employees' Retirement Association system, or PERA, could involve more defined-contribution plans, similar to a 401(k), in which the employee chooses to fund the plan. Democratic lawmakers prefer the current defined-benefits structure, in which the employer guarantees a specific retirement amount and bears the risk of promising the investment will be available. Democrats say more market reliance would introduce too much uncertainty.

But retirement wasn't the only issue at hand — Deirdre Boyd, a Steamboat Springs High School teacher, said some teachers in her area work two or three jobs to get by because of the high cost of living in the rural district.

Henry Roman, a teacher from Columbian Elementary School in northwest Denver, said class size is a pressing issue in his city.

Teachers in general have multiple jobs and can't afford to live where they work, said Roman, who had to wait tables for his first five years as a teacher.

“If we want to recruit and retain teachers, we have to offer a living wage and a viable retirement,” Roman said.

The Colorado Education Association wrote that based on a survey of more than 2,200 of its members, educators are spending, on average, \$656 per year out of their own pockets to buy students pencils, glue, binders, snacks and toothpaste, and covering costs of school lunch and field trips. Extrapolating that to the full association, members may be spending as much as \$23 million per year out of pocket, according to its website.

The upcoming 2018-19 state budget plans to give a \$150 million boost to K-12 school funding, which House Democrats have called “the biggest buydown since what used to be called the ‘negative factor’” — a budget-cut mechanism to school funding — started in 2009.

But advocates are pushing for more because the state is currently underfunding schools by about \$830 million, Dallman said. Per-pupil spending in Colorado has ranked near the bottom in the nation.

On the other hand, the PERA proposal could include changes to the retirement age and other measures to shore up the vastly underfunded program within 30 years.

Erin Swain, a teacher at Century Middle School in Adams 12 Five Star Schools, took issue with possible changes.

“Bottom line is, we were given a promise by our Legislature for our pension, and they are renegeing,” Swain said.

Becky Moraja, a teacher at Colorado's Finest High School of Choice in Englewood, said she and her family moved in with her mother in the past to survive on the salaries of her and her husband, who is also a teacher, rather than work two jobs.

“We're willing to contribute more” to PERA, but some parts of the bill go too far, said Moraja, who is thankful for recent bond funding Englewood voters have passed but lamented that Colorado students are among the least funded in the country.

# COMMUNITY DEVELOPMENT

## DEVELOPMENT HIGHLIGHTS

### Iron Works Village | 601 West Bates Avenue ▶

Project: 136 townhomes, condominiums, and single-family for sale units

- Construction continues on first six homes
- Construction continues on townhomes
- First homeowners to move in by late Spring

### 600 West Bates Avenue ▶

Project: Artist Studio

- Construction **completed**
- Occupancy anticipated in **April**

### 3555 South Clarkson Street ▶

Project: 6-story assisted living and memory care facility

- Construction is underway

**Swedish Medical Center | 501 East Hampden Avenue ▶**

Project: Parking Garage

- Construction continues

**3570/3576 South Logan Street ▶**

Project: Two buildings comprising a gross leasable area of 5,700 square feet. Medical and retail tenants being sought.

- Construction continues

**3615 South Elati Street ▶**

Project: City of Englewood Police Department

- **Construction is underway.**

**1125 East Hampden Avenue ▶**

Project: New townhome development with six for-sale units

- **Construction has begun.**

**Hilltop | 3800 South Broadway ▶**

Project: New 2,800 square foot commercial, 8 apartments.

- **Foundation work underway.**

**3400 South Broadway ▶**

- **Architectural rendering of former Lighting Outlet. The space will be reconfigured to offer up to eight office and/or retail suites. Construction is expected to commence Summer 2018.**

## Medical Office Building | 506 East Hampden Avenue

Project: A proposed five-story, mixed-use development with 14,000 square feet of retail (ground floor) and 104,000 square feet of medical office. The building proposes self-contained parking offering valet parking and 325+ parking spaces in a covered structure.

- A neighborhood meeting was held on Thursday, February 8, 2018.
- **A formal Planned Unit Development application has been submitted and is under review.**

## BOARDS AND COMMISSIONS

### Alliance for Commerce in Englewood

- Cindy Nowak from Manufacturers Edge provided ACE with an overview of training and technical assistance offerings for area manufacturers. Ms. Nowak also described the upcoming Englewood Manufacturer's Day networking event on Thursday, October 4.
- ACE mailed 23 handwritten 'Thank you for doing business in Englewood' cards to Englewood's oldest businesses. ACE is working to acknowledge and engage the businesses in the community based on their business longevity.

### Board of Adjustment of Appeals

- On April 11, the Board approved the following variances:
  - 3275 South Downing Street: A variance to encroach 21 feet into the required 25 feet front setback.
  - 3594 South Logan Street: A variance to add a 5th blade-style sign to increase business visibility.
  - 900 East Hampden Avenue: A zero setback to the adjacent alley in order to build an

addition to a structure with an existing zero setback.

### Historic Preservation Commission

- The Commission finalized its goals.

### Keep Englewood Beautiful

- The Commission is partnering with the Littleton/ Englewood Wastewater Treatment Plant for their Earth Day River Walk and Community Cleanup Project.
- Keep Englewood Beautiful will be hosting a lecture by Laurie Wagner on Backyard Composting as part of the Earth Day Project being held on April 22nd, 11am to 1pm, at the WasteWater Treatment Plant.

### Planning & Zoning Commission

- On April 3, the Commission continued discussion on the Urban Land Institute Healthy Corridors - South Broadway video. The Commission also reviewed and discussed short term rentals.
- On April 17, the Commission reviewed results of a Denver Regional Council of Government's small area analysis that projected growth to the year 2040.

## NEW BUSINESSES

Cardiology Now	101 W Hampden Ave #B	Health Care
Denver Auto Outlet	2397 W Dartmouth Ave	Used Auto Dealer
Duro Electric Company	2271 W Yale Ave	Contract Construction

Papa John's Pizza	5194 S Broadway	Fast Food Restaurant
Hospice Care of the Rockies	750 W Hampden Ave	Health Care
Synthetic Grass Headquarters	3740 S Jason St	
Myslik, Inc.	2869 S Shosone St	

## BUSINESS WORKSHOPS AND TRAINING

### ONE-ON-ONE CONSULTING

April 26, 2018 | 8:00 AM - 5:00 PM  
Englewood Civic Center, Third Floor

### MARKETING FUNDAMENTALS

April 26, 2018 | 6:00 PM - 8:00 PM  
Englewood Public Library

### ONE-ON-ONE CONSULTING

May 17, 2018 | 8:00 AM - 4:00 PM  
Englewood Civic Center, Third Floor

### STARTING A RETAIL FOOD ESTABLISHMENT

Thursday, May 31 9:00 AM – 12:00 PM  
Englewood Malley Center, 3380 S Lincoln St

# ECONOMIC DEVELOPMENT GRANTS

## **Business Environmental Compliance Grant**

This new program provides grants up to \$5,000 to support the installation of required environmental control devices that protect the integrity of the sanitary sewer collection system, wastewater treatment facility and the community's vital natural resources. Grants can be used for installation of structures, devices or equipment, such as grease and sand/oil interceptors, flow equalization units, gravity traps or mercury separators.

- **Approved:** Dolan Geiman, Inc. - \$2,500 to fund the installation of a 500 gallon sand oil interceptor at the new art studio at 600 West Bates Avenue.

## **Business Initiation Grant**

- **Approved:** Scented Studio - \$2,500 to fund tenant improvements that will allow for the business to extend the lease term.
- **Approved:** Peace Cellar - \$2,500 to fund tenant improvements that will allow this business to relocate to a new space in Englewood.
- **Application:** Dodd Manufacturing - \$2,500 to fund electrical service upgrades to support a new piece of manufacturing equipment.

# OTHER BUSINESS

- **5721 South Broadway:** Groove Automotive Group has leased this property as an expansion site.
- **1610 East Girard Place:** My Salon Suite is now open.
- **3496 South Broadway:** Samadi Yoga Studio is now open.
- **2750 South Broadway:** Plan are under review for a 3,786 sq. ft. building.

# REDEVELOPMENT

## **CityCenter Weingarten Foreclosure**

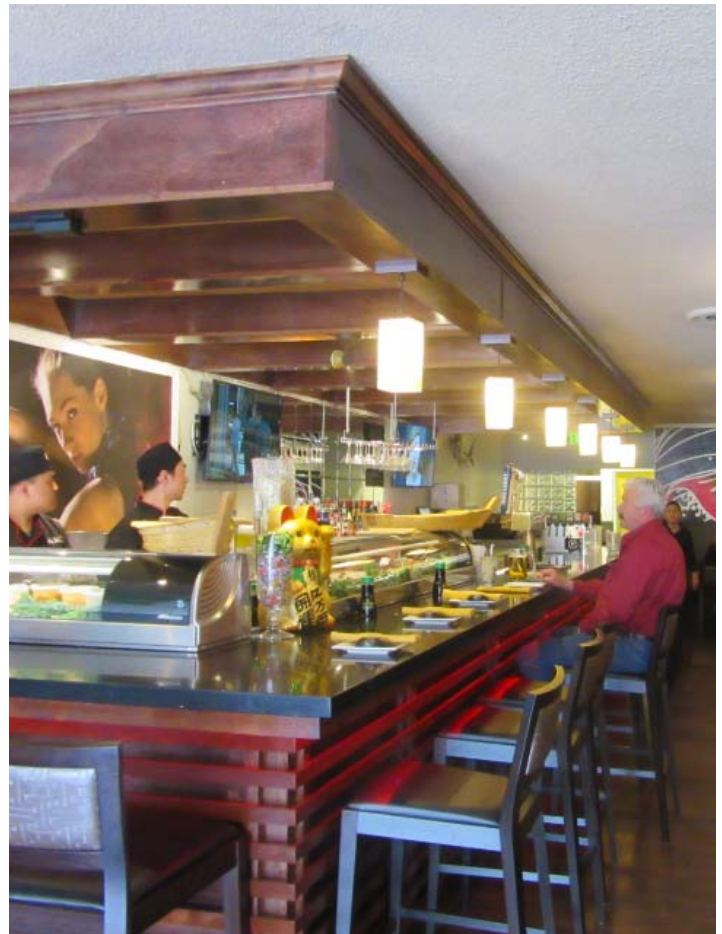

We are continuing to monitor this situation and communicate with the Receiver and Special Servicer who are dealing with the collateral for the defaulted \$33 million loan, which involves a long-term ground lease from the Englewood Environmental Foundation (EFF) to a Weingarten real estate entity. On behalf of the mortgage bondholders, the Special Servicer is continuing to manage and operate those portions of the CityCenter retail previously owned by Weingarten. It is expected that the Special Servicer will formally gain title to the property via an Arapahoe County Trustee's Sale, currently scheduled for May 2, 2018. No day-to-day changes for retailers operating in the CityCenter area are anticipated.

## Urban Land Institute's Healthy Corridors National Study

We are implementing further research and tasks related to the recommendations generated from the Urban Land Institute's national study team visit on January 29-31, 2018. This national team of experts focused on numerous opportunities to create additional value for Englewood by better connecting and supporting the synergies between the South Broadway Corridor, the Hospital District and the CityCenter area.

## Redevelopment Explorations

In tandem with Economic Development, we have initiated steps to make informal contact with owners and developers connected with select high-profile/high-impact Englewood commercial properties. These proactive steps will help ensure that property-specific opportunities and challenges are collaboratively identified early on in order to help achieve the best possible ultimate outcomes for the City and other stakeholders.

New restaurant at 3484 South Broadway - Aki Japanese Cuisine
