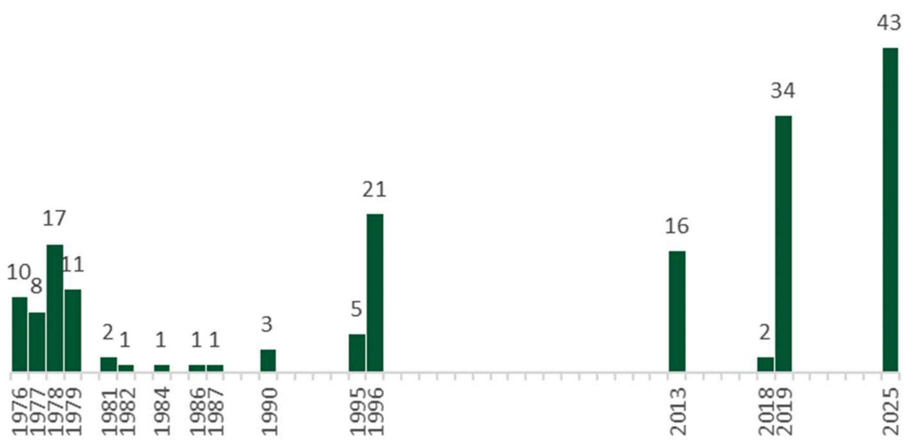
FIXED INCOME MARKET REVIEW

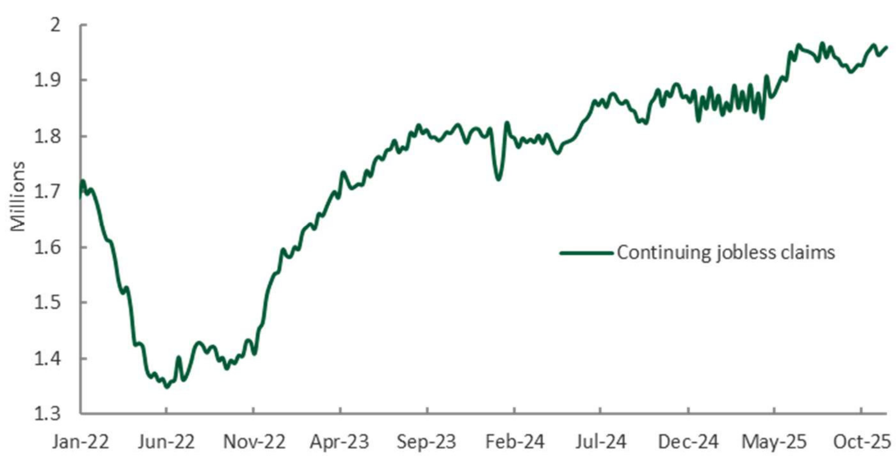
As of November 30, 2025

Chart 1: The government shutdown was the longest on record



Source: History, Art and Archives, US House of Representatives, Macrobond, November 30, 2025. Days are counted from the first day to the last full day that the government was shut down. The date the Public Law was signed is not included because that law opened the government when it went into effect.

Chart 2: Initial jobless claims fell over the month but continuing claims remained elevated



Source: Bureau of Labor Statistics, Macrobond, November 30, 2025.

Economic Indicators and Monetary Policy

The US federal government shutdown reached the longest in history at 43 days (Chart 1). The government reopened after Congress agreed to pass three of the 12 appropriations bills and a stopgap continuing resolution for the other nine. This left most federal agencies funded through to the end of January 2025, risking another shutdown at that time. The agreement did not include healthcare policy concessions that Democrats were initially seeking from the Republicans.

The reopening of the government allowed federal economic data releases to resume. However, given the inability to retroactively collect survey data, the Bureau of Labor Statistics cancelled the release of the CPI and payrolls reports for October. Meanwhile, the Bureau of Economic Analysis delayed the October PCE inflation report. Producer price inflation (PPI) final demand remained at 2.7% year-over-year which Core PPI slowed from 2.9% to 2.7%.

The payrolls report for September showed 119,000 new jobs, above consensus expectations for 50,000, with job gains heavily concentrated in healthcare and leisure and hospitality. There were 33,000 worth of downward revisions to the previous two months. The unemployment rate rose from 4.3% to 4.4%, its highest level since 2021.

Elsewhere, initial jobless claims reached 216,000 at the end of the month, the lowest since February. However, continuing claims rose to 1.96 million, close to cycle highs.

Minutes from the October Fed meeting confirmed a bifurcation within the committee between those wishing to cut rates in December and those leaning toward keeping rates unchanged. However, during the month Fed members such as Governor Christopher Waller offered support for a 25bp rate cut in December, noting the labor market was “nearing stall speed”. Markets moved to price in a 95% probability of a December rate cut.

On the trade front, the US scaled back a number of agricultural tariffs and announced an agreement with China to reduce tariffs on certain imports while introducing trade framework deals with a number of countries in Southeast Asia and Latin America.

Interest Rate Summary

Front end yields fell, helping to modestly steepen the US curve. At the end of November, the 3-month US Treasury bill yielded 3.8%, the 6-month US Treasury bill yielded 3.76%, the 2-year US Treasury note yielded 3.49%, the 5-year US Treasury note yielded 3.6% and the 10-year US Treasury note yielded 4.01%.

ADDITIONAL INFORMATION

As of November 30, 2025

Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.

The performance results shown, whether net or gross of investment management fees, reflect the reinvestment of dividends and/or income and other earnings. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment. The performance shown is for the stated time period(s) only.

Any target performance aims are not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for the returns to be significantly different than expected. Investments are subject to risks, including loss of principal. There can be no guarantee that any investment strategy will meet the liability funding needs of a particular client.

Performance information for certain accounts may reflect performance achieved while the account was managed at a prior firm. In addition, the performance and customized benchmark information for these periods are based on Information from 3rd parties that Insight believes to be accurate, but Insight has not independently verified such information and no representation is made regarding its accuracy or completeness.

The quoted benchmarks do not reflect deductions for fees, expenses or taxes. These benchmarks are unmanaged and cannot be purchased directly by investors. Benchmark performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be material factors relevant to any such comparison such as differences in volatility, and regulatory and legal restrictions between the indices shown and the strategy.

Any currency conversions performed for this presentation, use FX rates as per WM Reuters 4pm spot rates, unless noted otherwise.

Funds and portfolios with an ESG objective follow a sustainable or ESG related investment approach, which may cause them to perform differently than funds that are not required to integrate sustainable investment criteria when selecting securities. Funds and portfolios with no ESG objective are not required to integrate sustainable investment criteria when selecting securities so any ESG approach shown is only indicative and there is no guarantee that the specific approach will be applied across the whole portfolio.
